Yes. If you want to say add that OU2 and OU3 are the former smelter locations, that might mean more to people. But I don't want to make things more complicated at this point, so it's also fine as is. Thanks so much for your help Lisa. And welcome back from Espana!

Yes – Jesse sent me an edit – does it work?:

Groundwater impacted at the former smelter locations is currently being addressed as Operable Units 2 and 3 of the VB/I-70 Superfund site.

Sorry everyone, but the last sentence is not correct. Groundwater is being addressed at both OU2 and OU3, the locations of the former ARGO and Omaha & Grant Smelters, respectively. This reads as if groundwater is its own separate OU – OU3- which it is not. This must have been a last minute sentence added yesterday. Sorry I couldn't chime in yesterday afternoon but I was in a CAG meeting all yesterday afternoon in Canon City and then endless, horrid traffic for hours coming home. Maybe we can still change it?
